

Escape the Gap: *Too Much To Do, But No Cash To Hire*

Donny Wyatt, CEO & Founder
CoConstruct.com

Donny Wyatt is CEO and Founder of CoConstruct.com, the #1 rated (by SoftwareAdvice.com) cloud-based software for custom home builders and remodelers.

After a career in software development and business process consulting, he and his wife moved in 2004 – and built a custom home. The obvious challenges for both builders and clients in the homebuilding process were all too apparent to Donny. That formed the inception for the idea of a better way to handle communication and project management online in the building industry, and lead to the launch of CoConstruct in July 2005.

Today, CoConstruct has been named by Inc. Magazine as one of the fastest growing privately held companies in the US three years in a row, used by thousands of custom building and remodeling companies to handle billions of dollars in projects managed every year on its platform.
